

GRAPPLE TOWER

WINKLE

The Winkle Industries grapple tower is a certified engineered mechanical lifting device. Its versatile design will affix to any manufacturer's scrap magnet.

The ability for the operator to seamlessly transition between grapple and magnet use is a key feature of this design. Not only does it enable versatility in handling different materials, but it also prioritizes safety and efficiency, ultimately leading to maximum uptime for the equipment. This design's user-friendly interface or mechanism for switching between functions ensures that the operator can perform these transitions with ease and without unnecessary delays. This, in turn, contributes to a more productive and cost-effective operation.

**Custom Designs to Fit
Applications Utilizing
30" - 68" Magnets.**
